

# The biodiversity index explained

By Steven Hoek (June 2024)

## Introduction

In the following we explain how we have arrived at ...

The biological experts told us that each species had to be distinguished separately, so unique codes were needed.

## Background

Crop codes were based on the EPPO codes – see <https://gd.eppo.int/>

Sometimes these codes were modified because ...

Stored in the AgroDataCube database as category ...

## Algorithm

All borders between fields are counted, provided 2 bordering parcels have crops with different codes on them ...
